ccb Connect

ccb Connect is a flexible software layer designed to integrate third party solutions with ccb by dsb®. Common scenarios are integration with Data Warehouses, Online-Shops, Self-Services and Apps.

ccb Connect offers a wide range of optimized interface technologies and is in constant development to accommodate new technologies and use cases. It currently offers:

- Webservice-API (SOAP / REST) for online access to ccb Suite
- Batch-Interfaces for high-volume processes
- Payment provider integration (e.g. PayPal, Amazon Payments, Wirecard)
- Support of access verification for digital content (e.g. Adobe APS, Google Newsstand)
